

Barb Carstens : In memoriam

As many of you know, Barb Carstens died suddenly at Grace Hospital on December 6, 1989. She had undergone surgery two days earlier but then suffered a cardiac arrest followed by a pulmonary embolism.

Barb devoted many hours of service to MHLA and other professional organizations. She was our current President, co-worker, and friend. Throughout the years, Barb was an active and enthusiastic member of many MHLA committees. She had a strong commitment to resource sharing on both professional and personal levels. We are all the beneficiaries of her work with the MHLA *Union list of serials*. Barb also routed her library journals to many of us, often writing pertinent notes on the routing slips about articles of interest.

Two funds have been established in Barb's name.

MHLA has established a fund in memory of Barb. Funds received will be used to purchase items of interest to health professionals and/or librarians and will be donated in her name to libraries with health collections in Winnipeg. Materials will be selected in May and a letter will be sent to Barb's parents. Please make cheques payable to the Manitoba Health Libraries Association and send them to:

Manitoba Health Libraries Association
Box 232
Winnipeg, MB
R3M 3S7

Please note that MHLA is not a registered charity.

Another fund has been established at the University of Manitoba where funds will go for general acquisitions in Barb's name. People may also wish to contribute to the Libraries Endowment Fund. Donations to either fund should be sent to the attention of Sandi Friesen, Room 152, Elizabeth Dafoe Library, University of Manitoba, Winnipeg, Manitoba, R3T 2N2. Please make these cheques payable to the University of Manitoba.

Many people have asked for Mr. and Mrs. Carstens address. It is:

Mr. and Mrs. W. T. Carstens
3436 Puget Drive
Vancouver, B.C.
V6L 2T5

I knew Barb for only a year, but during that time she helped me in countless ways. She always had the time to answer a question, fill in background information, or send notes and advice. Perhaps it was Barb's friendship that I experienced the most. I know I was not alone as she had many friends and will be sadly missed.

- Ann Thornton-Trump

The *MHLA news* (ISSN 0821-1310) is published three times a year in September, February, and April. The opinions expressed by the editor and contributors are not necessarily the official policy of the Manitoba Health Libraries Association (thank heavens). Distribution is free to both individual and institutional members of the Association and to other regional chapters of the Canadian Health Libraries Association.

1990 membership dues in MHLA are as follows:

PERSONAL	\$15.00
INSTITUTIONAL	50.00
ASSOCIATE	20.00

This issue of the *News* was produced using Word Perfect v5.0 on a 1.3MB Toshiba T1000 laptop and printed in Palatino on an Apple Laserwriter IINT. It prints nice but it sure is slow! Submissions for the spring issue should be received by April 2, 1990 at the following address:

Charley Pennell
Editor, MHLA news
Helene Fuld Nursing Library, SBGH
431 Tache Avenue
Winnipeg, MB R2H 2A7

* * * * *

ON-LINE USERS GROUP MEMBERS and those desirous of sharing information and ideas on on-line searching, CD-ROM databases, etc. will be pleased to hear that a session has been scheduled for 11:45 in the Education Classroom just prior to the regular winter meeting at Victoria General Hospital on Feb. 20th. For more information call Michael Tennenhouse at U of M Medical Library, 788-6466.

Within the larger MHLA group meeting in February, A. Lionel Weinberg, Barrister/Solicitor will be speaking on copyright issues as they affect libraries.

Letters to the editor

The Serials Committee is happy to report that all twenty-five additional copies of the *Union list* have been sold. Copies have been sent to health libraries throughout Manitoba and to two libraries in Saskatchewan. If you were planning to order a copy, please let a member of the Committee know. This will help us to determine how many lists to order for the next edition.

While praising the *List* in the September newsletter, our editor also expressed some niggling questions about the form of a few entries to which the Committee would like to respond.

The appearance of the titles *JAMA* and the *Journal of the American Medical Association* is not a duplication. *Journal of the American Medical Association* is the earlier form of the title. Both earlier and later titles are connected by see references (AD and EX).

However, our editor is correct in pointing out that the titles *American journal of occupational therapy* and *AJOT*, with holdings split between them, should not both be used; and clearly the appearance of both *Nursing* and *Nursing88* is another example of non-standardization.

This simply points out that the work of producing a *Union list* requires the combined efforts of many: the publisher (in maintaining a database of accurate, standardized bibliographic records to which our titles and holdings information are attached), the contributors (in submitting complete, accurate titles and holdings information), and the Committee (in setting policy, instructing and undertaking pre-publication checking).

For the present, the Committee is continuing to solicit corrections and suggestions to the *List* and would like to encourage the membership to give thought to the new edition due for publication in 1991.

The Serials Holdings Committee

Editor's note: I stand corrected on the example of the *JAMA*- a closer read should have caught that. AACR2r rule 12.1B2 apparently is aimed

specifically at eliminating title changes caused by marketing-inspired stylized initialisms at head of title. The national cataloguing agencies have already gone back and recatalogued some titles originally treated as changes due to stylistic devices. On another note, you will find changes to the *Union list* of a different kind on pages 5-8 of your *News*, coyly placed in the middle so you can open up the staple, snap out that section and tuck it neatly into your *Union list*.

MHINET established jointly by MHO/MARN/HSC

In parallel votes, the Boards of Manitoba Health Organizations, Inc. (MHO) and the Manitoba Association of Registered Nurses (MARN), in conjunction with the Health Sciences Centre, approved the two-year funding of MHINET, the Manitoba Health Information Network, to be physically located at the HSC in Winnipeg. Unlike its predecessor and model, WHINET, which ran as an 18 month demonstration during 1983-1985, the new service extends to nurses and administrators throughout the province and includes a document delivery service through the facilities of the HSC as well as provisions for continuing education and consultation for local information providers. Manual and on-line reference services will be available through toll-free telephone lines. Specialized bibliographies and current awareness tools will be compiled and maintained by MHINET staff and routed to individuals and libraries.

The project, which started in January of this year, is expected to at least partially fill the void left by the closing of the MARN library last fall. Rural nurses have already begun funneling requests for materials to the HSC even while staffing for MHINET remains unsettled.

For more information concerning MHINET services contact Manitoba Health Organizations, Inc., Education Services at 360 Broadway in Winnipeg or phone 942-6591.

LC rebuffed on royalties from offshore MARC sales

James Billington, Librarian of Congress, has been sending ripples of fear through the hearts of many a cataloguer and cataloguing vendor over the past 12 months. A shortfall of \$5 million dollars in revenue generated by the Cataloging Distribution Service prompted Billington to seek licensing fees from bibliographic utilities and other heavy users of LC MARC records. Licensing fees are already charged by most other national MARC producers, at least one of whom (Australia) also collects licensing fees on the redistribution of LC's records within their country. LC's move was seen as a direct threat to the livelihood of UTLAS, WLN, RLIN and OCLC, who mount LC tapes on-line and on CD-ROM for reuse by libraries. Also to be affected were the CD-ROM only vendors, such as GRC (Laserquest), Gaylord (SuperCat), and the Library Corporation (Bibliofile), who tend to sell to smaller libraries which can ill afford to pay any additional costs.

At first, challenges from the library community under the U.S. *Freedom of information act* halted action on resale of LC cataloguing within the U.S., but MARC tapes sold to foreign agencies or to foreign libraries through U.S. firms were seen as likely targets of increased charges. OCLC and the OCLC Users' Council were among the first to voice strong opposition to LC's plans as this would have had serious implications for their profitability abroad. Canadian libraries using LC records supplied by Utlas Inc., TKM, and even the National Library of Canada could have been subject to the levies, adding to the already high cost of cataloguing in this country.

At a special ALCTS (Association for Library Collections and Technical Services) debate on this issue scheduled for ALA Midwinter in Chicago, LC backed down on the licensing issue due to the strong reaction from libraries across the continent. For 1990 subscriptions they have decided to implement price increases as a way of recovering costs plus 10% as required by U.S. law. As a result, prices are expected to rise by 30% in the U.S. and by 39% in Canada. In case you are curious, the National Library of

Medicine has had a policy of using a domestic/foreign price differential for NLM MARC and Medline tapes for some time.

"Bridge opening" slated for spring - includes holdings of SBGH libraries and U of M

The long awaited unveiling of public access to Bridge, the University of Manitoba/St. Boniface General Hospital implementation of the Unisys PALS system is now slated for May. Available to some staff since last November, the Bridge database now includes over 450,000 titles catalogued through Utlas by the Fort Garry and Medical campuses of the University plus another 4,000 catalogued at the hospital through Utlas and Bibliofile. As retrospective conversion continues at both the Helene Fuld and McEwan Libraries at SBGH and at the University, the size of the database is expected to swell to close to 700,000 titles by 1991. The University expects to provide Bridge service to the general public much as they presently do for UMSEARCH. Access to the public will be by dedicated terminal at host sites and by modem into UUNET externally. More information on access to Bridge may be obtained through Pat Nicholls at Dafoe Library, 474-6618.

While the University's records have been publically available on-line for some time, and the Carolyn Sifton Library's since 1989, Bridge will be the first OPAC to show the holdings of St. Boniface's Fuld (Nursing) Library (I'm so proud- the editor!).

Once entered into PALS, records may be retrieved by the usual author, title and subject access and by keywords in those and the note fields as well. Searches may be qualified by format (series, maps, audio-visual media, etc.), by date, or by language. Display can be either mnemonically tagged (i.e. TITL, AUTH, SUBJ, NOTE, etc.) or MARC.

Once the Online Public Access Catalogue (OPAC) is up and running, attention will be

Bridge opening (continued from p. 4)

paid to implementing the circulation module, most likely by this summer. It is expected that Acquisitions will follow in early 1991 with Serials Check-in coming somewhat later. Once Circulation is up, the patron will be able to determine availability of material at the catalogue. In addition, it will be possible to determine periodical holdings at the issue level- a useful tool for ILL requesting. Once Acquisitions is implemented, the patron should be able to retrieve on-order records as easily as those already received- by keyword, by subject, and so on.

CD-ROM users complain of response time degradation

Users of Silver Platter, Wilsondisc, and Compact Cambridge CD-ROM databases report some problems with response time which seem to be traceable to two sources: Philips drive units and rebooting or turning off the host computer (or printer) without properly exiting from the search software or letting a print job run its course. Participants in the PACS-L conference on Bitnet report situations where their software has even locked up due to a lack of hard disk space. Losses of up to 10MB were noted.

The problem occurs when disk areas allocated as temporary storage for printing or displaying are not reclaimed when a user is through working at a CD-ROM station. Since these temporary work areas are not "logical" files recorded on the disk's FAT (file allocation table), they do not display when the DIR command is given. The remedy is to run CHKDSK/F from DOS. When queried "Convert lost clusters to files?", answer N and your missing disk space is recovered until the next time a frustrated patron shuts off the computer while stuck in the middle of a search or decides they have printed enough citations to do their paper. One librarian suggested loading chkdisk into your AUTOEXEC.BAT file (the first file to be executed whenever the system is booted). The

command `ECHO 1N CHKDSK/F> nul` in your AUTOEXEC file causes the system to run chkdisk and answer No to the "Convert lost clusters..." question whenever the system is rebooted. Anyone experiencing degradation of response time with their CD-ROM software might want to try this. A second librarian urges caution when doing this. He suggests that it is best to do a simple CHKDSK before doing CHKDSK/F to determine that lost clusters are the only problem.

PACS-L network offers on-line help through Bitnet

A listserv conference dedicated to sharing concerns and news of all manner of library online databases was initiated in July by the University of Houston using the services of Bitnet, the international academic electronic mail system operated without profit by Educom. Topics raised on the conference include everything from the mundane (where can I get a Hitachi CD-ROM drive repaired) to the sublime (full text databases). Not all of the information is useful, and unfortunately one has to wade through all of it, since there is no index to the incoming messages and they arrive at a rate of 10-20 per day! Access to Netnorth/Bitnet is free and is available to academics through their campus computer system.

Results of the Interlibrary Loan charges survey

At the last MHLA meeting the members decided to conduct a survey on Interlibrary Loan charges in member libraries. This survey was suggested to help libraries set a fee for their institution for the cost of receiving and sending ILL's by fax machines. It was also done to assess how varied the Interlibrary Loan charges currently are with an eye to the possibility of setting up a uniform charging system within our member libraries. Following are the results of this survey.

20 ILL survey letters and forms sent

13 responses

1 response was unusable due to misinterpretation of questions

12 library responses are as follows

ILL SURVEY

Charges to your client

1. Photocopies received from MHLA member libraries
 - 7 libraries - do not charge
 - 3 libraries - actual charges (amount lending library charges you)
 - 1 library - \$2.00/filled request except items received from U of M Med Library
 - 1 library - \$2.00/request
2. Photocopies received from Non-MHLA member libraries
 - 4 libraries - actual charges (amount lending library charges you)
 - 1 library - \$2.00/filled request
 - 1 library - \$2.00/request
 - 1 library - \$3.50-\$5.00/loan
 - 1 library - \$2.50-\$15.00/loan
 - 1 library - actual charges plus \$3.00
 - 1 library - no charge if work related - actual charge
 - 2 libraries - no charge
3. Book loans received from MHLA member libraries
 - 10 libraries- no charge
 - 2 libraries - \$2.00/loan
4. Book loans received from Non-MHLA member libraries
 - 6 libraries - no charge
 - 2 libraries - actual charges (amount lending library charges you)
 - 2 libraries - \$2.00/loan
 - 1 library - actual charges plus \$3.00
 - 1 library - no charge if work related - actual charge for personal
5. AV software received from MHLA member libraries
 - 10 libraries- no charge
 - 2 libraries - \$2.00/loan

Charges to other institutions for Interlibrary Loans you provide

1. Photocopies provided to Non-MHLA member libraries
 - 7 libraries - actual charges (amount lending library charges you)
 - 3 libraries - no charge
 - 1 library - \$.10/page
 - 1 library - \$5.00 minimum - first 20 pages - \$.25 each additional page unless there is an ILL agreement
2. Books provided on loan to Non-MHLA member libraries
 - 5 libraries - actual charges (amount lending library charges you)
 - 3 libraries - do not loan
 - 3 libraries - no charge
 - 1 library - \$5.00 unless there is an ILL agreement with other institution

FAX CHARGES

Only 5 responding libraries have fax machines.

- 1 library - did not have a set policy as of yet
- 2 libraries - do not charge for Fax Interlibrary Loans
- 1 library - \$5.00 for 1-5 pages; \$1.00 each additional page

CONCLUSION

There seems to be a wide variety of Interlibrary Loan charges within our member libraries. I believe that it would be better for the clients who have access to more than one of our member libraries if we were to have a uniform charging system. Realistically though, I am not sure it would be possible to arrive at a uniform charging system that would be acceptable to all the member libraries.

Concerning the Fax charges, there are not enough libraries currently using fax machines to be able to determine a prevalent policy.

University-industry grants and awards guide 1989/1990. Ottawa : Medical Research Council of Canada, 1989.

The aim of this program is to provide an opportunity for health science researchers to work in close co-operation with industry. The guide details the general regulations for making application, ethical considerations, fellowships as well as sample forms.

AUDIO VISUAL INTEREST GROUP

New staff ed videos from SBGH

St. Boniface General Hospital Nursing Division has produced several staff education videos in 1989. Here is a small selection. These programs are available for sale or loan. For more information call Sonja Paas at 237-2078.

Management of feeding disabilities (110 min.) VHS.

Lecture by Wayne Reimer, O.T.M., St. Amant Centre, on theory and practice of management of dysphagia.

Preeclampsia : the disease and its treatment. (48 min.) VHS.

A lecture by Dr. Diane Biehl.

Simple dressing change. (42 min.) 3/4 in.

Suitable for RN and LPN students.

Urinary catheterization, male and female. (59 min.) 3/4 in.

Demonstration of nursing procedures inserting a retention catheter and a straight catheter.

Venipuncture : blood collection. (21 min.) 3/4 in.

Venipuncture : I.V. insertion. (28 min.) 3/4 in.

Short evaluation of the spring Media Preview from February 20-April 28, 1989

Nine institutions participated: Concordia, Seven Oaks, Misericordia, Deer Lodge, Grace, Victoria, Health Sciences Centre, St. Boniface and Brandon. Ten different programmes from three distributors were available for preview. After the preview evaluation questionnaires were sent out and 7 were returned. Generally the spring preview was viewed positively by all.

Some specific comments: videotapes were current and appropriate. Time of year (spring) is better than fall. The viewing time per institution was one week, but this was too short for some, because of the Easter long weekend within this period. All institutions felt that they saved time and energy and money by participating in the program. Most felt that 10 tapes was an appropriate number to view in one week and they thought that there was a good variety of clinical and general tapes. Some felt that the written correspondence and directions received from the AV committee were not quite clear. All institutions are interested in another preview in the future. Some topics suggested were: ethical issues, care of the elderly, abuse of the elderly and health promotion topics.

- Sonja Paas

Union list of videocassettes expected this spring

Data entry has already begun on the AVIG *Union list of videocassettes*. Videos in the VHS and U-matic (3/4 in.) formats held by the Canadian Diabetes Association, Concordia Hospital, Deer Lodge Centre, Foyer Notre Dame, Manitoba Health, Rock Lake Health District, St. Boniface General Hospital, and Victoria General Hospital are being entered into a database for production of this hopefully useful finding tool for AV materials. It is expected that the first edition will be forthcoming this spring with annual cumulations after that. It is also hoped that additional libraries will contribute to the listing once it has proven its worth. In any case, Pat Hebert and Charley Pennell plan to have data entry completed for the 1st edition by late February or early March with public availability slated for early this summer.
